

Table 4 The effect of sucrose on the rejuvenation of tissue culture

Treatment	Concentration of sucrose	Average seedling height (cm)	Growing state
1	10	0.91±0.04 ^c	Narrow and small leaves with unobvious internodes
2	20	1.97±0.50 ^b	Flat leaves and obvious internodes
3	40	2.19±0.33 ^a	Luxuriant growth with flat leaves
4	50	1.80±0.16 ^b	Leaves and internodes are red

Note: The variance analysis of different lowercase alphabets in the table was significantly different ($P<0.05$)
